## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a video processing apparatus comprising storage means for allocating addresses to said video data inputted by said input means in an ascending order and storing said video data and reading means for reading out said video data stored in said storage means in the ascending order of the addresses.

Group II, claim(s) 6-13, drawn to a video processing apparatus for decoding a video stream having a layer structure constructed by a sequence layer, a GOP layer, a picture layer, a slice layer, a macroblock layer, and a block layer.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Invention of Group I lacks the corresponding special technical features of Sequence\_Header information predicting means for predicting Sequence\_Header information on the basis of information which certainly appears in a picture and decoding means for decoding video data by using the information predicted by said Header information predicting means when said Sequence\_Header is not detected of invention of Group II.

Invention of Group II lacks the corresponding special technical features of storage means for allocating addresses to said video data inputted by said input means in an ascending order and storing said video data and reading means for reading out said video data stored in said storage means in the ascending order of the addresses of invention of Group I.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
